

The HHAeXchange Implementation EDI Process

Overview & timeline for Providers using Electronic Data Integration (EDI) to transmit 3rd Party EVV data

Overview

Thank you for participating in the Electronic Data Interchange (EDI) project for your Agency. This letter provides information, general requirements, and steps to take to successfully integrate your Agency Management System with HHAeXchange (HHAX).

HHAX coordinates directly with Illinois to ensure that members and authorizations are passed directly into the HHAX system. HHAX uses the provider agency Tax ID Number (TIN) and National Provider Identifier (NPI) number combination to identify data records sent to and from your Agency.

To integrate between your 3rd Party Agency Management System and HHAX, providers are required to comply with both the business requirements and technical specifications listed in this document. The first step is to review the content of this packet and initiate contact with HHAX to begin the integration process.

HHAX API Interface

HHAX API Interface (into HHAeXchange)

The **API Interface** exchanges data from third party providers and EVV vendors to HHAeXchange. The API Interface portal simplifies data submission by removing the need to import files. Once EVV records are sent from the third party EVV system to HHAX via the API, a timestamp is automatically created showing the status of the transaction. The status is then sent back to the provider via the message interface, allowing for real-time tracking of messages.

Note: Providers' third party EVV systems must be able to provide required data for EVV aggregation to HHAX in real time via API. For third party providers and EVV vendors that require access to the API portal, please submit a ticket on the [Client Support Portal](#) with the subject line 'Illinois EVV'.

Production Process and Transmission Frequency

For optimal system performance, HHAX recommends that visit data is sent in near real-time. The expectation is for data to be sent by the provider or EVV vendor to HHAX as it is added, changed, and/or deleted in the third party EVV system. Data that is unchanged should not be resent to HHAX.

Timeline and Steps for EDI Integration Readiness

The timeline outlined below represents guidance and expectations throughout the API Interface Integration process to move toward compliance according to the Illinois EVV program.
