Manually enter the Visit Start Time. <p>OR</p> <p>Search for the <i>Call In</i> EVV on the Call Maintenance page. If found, resolve the issue and link to the Visit.</p>
<p>Potential In/Out Mistake</p>	<p>In the Call Type column, click on either the <u>IN</u> or <u>OUT</u> link to swap the EVV from IN to OUT or vice versa.</p>
<p>Incorrect Linked-Case Call</p>	<p>EVVs with this status cannot be fixed. Click on <u>Reject</u> in the Action column to discard the call. The Visit either requires a manual confirmation, or another EVV placed by the Caregiver at the right time.</p>
<p>No Schedule Opening</p>	<p>This problem occurs when the system cannot categorize a call exception into any of the other statuses. User must either research the call and visit info in order to identify the error OR click on <u>Reject</u> in the Action column to discard the call.</p>

GPS Confirmation Issues

Problem	Resolution
GPS Signal Not Detected	EVVs with this status cannot be fixed. Click on Reject in the Action column to discard the call. The Visit requires a manual confirmation.
GPS Signal Out of Range	<p>In some scenarios, the coordinates attributed to an address by Google Maps do not properly reflect the actual coordinates of the Patient's home. This is particularly true of rural addresses but may also occur in cities when a Patient lives in a large apartment complex.</p> <p>To address this issue, users may recalculate the coordinates of a Patient's address using the coordinates associated with GPS based EVV that is being held on Call Maintenance. This allows Agencies to correct the coordinates attributed to an address by Google by replacing them with the more accurate EVV coordinates.</p> <p>Further information may be found under the Edit GPS Coordinates section of the EVV Management Process Guide.</p>
Unscheduled – Patient not Scheduled	EVVs with this status cannot be fixed. Click on Reject in the Action column to discard the call. The Visit requires a manual confirmation.

FOB Confirmation Issues

Problem	Resolution
Invalid FOB Passcode	EVVs with this status cannot be fixed. Click on Reject in the Action column to discard the call. The Visit requires a manual confirmation.
